

IN THE SPECIFICATION:

Page 24, please amend the paragraph beginning at line 10 as follows:

Fig. 9 shows a configuration of a turbine generator according to a fifth embodiment. This embodiment is an improvement over the first embodiment, which is effective in the case where the axial length of a stator iron core 2 becomes longer. In this embodiment, the axial interval between two adjacent ventilating ducts 5 provided in the stator iron core 2 is set at a large value in a first ventilating circuit 29 and is set at a small [[,]] value in each of second and third ventilating circuits 30 and 31, which are larger in ventilating distance and thermal load than the first ventilating circuit 29. The remainder of the configuration is the same as that of the first embodiment, and therefore, a description thereof is omitted.
